

# JOURNAL OF HYDRAULIC RESEARCH

Volume 53 Number 6 2015

## CONTENTS

### Forum paper

Aquatic vegetation – a primer for hydrodynamic specialists  
 MATTHEW T. O'HARE 687

### Research papers

DANS model for vegetated open channel flows  
 CHI-WAI LI AND JIAJIA LI 699

Parameterizing suspended canopy effects in a three-dimensional hydrodynamic model  
 FEARGHAL O'DONNCHA, MICHAEL HARTNETT AND DAVID R. PLEW 714

Numerical modelling of longitudinal dispersion in tidal flows with submerged vegetation  
 JIN HUANG, XIAOFENG ZHANG AND VIVIEN P. CHUA 728

Thermal-hydraulic characteristics of stratified shear flow in braided rivers  
 LIGU, QIULAN LI, ZULIN HUA, LANLAN WANG AND HANG YUAN 747

Effects of hydropeaking on the hydrodynamics of a stratified reservoir: the Rapel Reservoir case study  
 GERMÁN IBARRA, ALBERTO DE LA FUENTE AND MANUEL CONTRERAS 760

Experimental study of the flow structures of 3D turbulent offset jets  
 BAAFOUR NYANTEKYI-KWAKYE, MARK F. TACHIE, SHAWN P. CLARK,  
 JARROD MALENCHAK AND GETNET Y. MULUYE 773

Theoretical and experimental study on the vortex at hydraulic intakes  
 HONGLIANG SUN AND YAKUN LIU 787

Predicting wave loads on adjacent cylinder arrays with a 3D model  
 CHEN YANG, YING LIU AND CHANGGEN LIU 797

### Technical notes

On validating predictions of plant motion in coupled biomechanical-flow models  
 TIMOTHY I. MARJORIBANKS, RICHARD J. HARDY AND DANIEL R. PARSONS 808

The motion of entrapped air cavities in inclined ducts  
 HAMID BASHIRI-ATRABI AND TAKASHI HOSODA 814

Statistical quality control of streamflow measurements with moving-boat acoustic Doppler current profilers  
 HENING HUANG 820
