'Vigilance' as keeping careful watch to avoid possible danger and difficulties. For example, parents keep a watch on their young children to avoid any untoward incident or accident. In the context of an organization, vigilance means keeping the watchful eye on the activities of the personal and taking prompt action to promote fair practices and ensure integrity and honesty in the official transactions and behaviors.

Vigilance is essential everywhere. However, a focused attention is required where, Accountability is low, Individuals are prone to corruption, Delay in decision making is detrimental, Officials have high discretions, There is scope for jumping the queue, Rules/procedures are complex
